

sd_mean

I cant think why these correlations are so strong?? But you can see them (sort of) in this plot of for each site
- I tried to order by median, not sure why only some of them have done that, the rest just plonked themselves on the end.

Have I done something stupid with the data? And created this?

```
## Warning: Removed 30 rows containing non-finite values (stat_boxplot).
```

Warning: Removed 136 rows containing non-finite values (stat_boxplot).
